

Variables we plan to explore:

Research question: How does the frequency of web use correlate with reported levels of happiness, social trust, and outlook on life among different age groups?

Name of Variable in Dataset	Description
AGE	Respondent's age
GENDER1	Respondent's gender
WEBHLTBEH(categorical)	To what extent do you agree or disagree with the following statements? During the past 12 months, information on the internet... affected my health behavior in a positive way.
WWWHR	Not counting email, how many minutes or hours per week do you use the Web? (Include time you spend visiting regular web sites and time spent using interactive Internet services like social media, streaming services, chat rooms, online conferencing services, discussion boards or forums, and the like.)
HAPPY	Taken all together, how would you say things are these days--would you say that you are very happy, pretty happy, or not too happy?
HEALTH	Would you say your own health in general is excellent, good, fair, or poor
LIFE	In general, do you find life exciting, pretty routine, or dull
